2013 Building And Structural Surveying

Ordinary Differential Leveling Determining or establishing elevations is, at times, the most essential activity of the field engineer. Elevations are needed to set slope stakes, grade stakes, footings, anchor bolts, slabs, decks, sidewalks, curbs, etc. Just about everything located on the project requires elevation. Differential leveling is the process used to determine or establish those...

Discuss these 3 options with your builder before building in a Flood Zone: STRUCTURAL ELEVATION. This is your best bet. Building on stilts or pilings will safeguard your home from rushing flood water. You may even have the building built to have the rushing water flow beneath the structure, keeping you and your belongings safe from the storm. FILL
