A Personal Watercraft, commonly known as a Jet Ski, is a small boat that's propelled by a jet drive engine and is controlled by handlebars that are similar to those in motorcycles. The term Jet Ski became synonymous with the PWC after Kawasaki launched its first personal watercraft under the brand name in the year 1974.

As you've likely figured out by now, the fastest Jet Ski, WaveRunner, and Sea-Doo models have the potential to go much faster than 65 -67 mph, though they can't do so straight off the shelf. It's well-known among PWC fans that, if you want a faster ride, the best method is to modify your craft to extract more power from the engine.

How Fast Does the Average Jet Ski Go? Jet skis, on average, are about 800 pounds. They're incredibly lightweight compared to other vessels, so you should anticipate going exponentially faster, right? That all depends on the model of jet ski you buy. On the lower side, the max speed some jet skis can hit is 40 MPH, which admittedly isn't all ...
