Graham Cracker Plate Tectonics Lab

Graham Cracker Model of Plate Movements. Purpose: To study the interactions of the tectonic plates as they move slowly on the asthenosphere. Background: The Theory of Plate Tectonics states that the crust of the earth is composed of 16 major pieces or plates. These plates "ride" on the hot plastic upper mantle known as the asthenosphere.

Graham Cracker Model of Plate Movements

Graham Cracker Plate Tectonics Lab just a little info... The Theory of Plate Tectonics states that the crust of the Earth is composed of seven major plates and numerous smaller plates. These plates "ride" on the hot plastic upper mantle called the asthenosphere. This theory also says that most of these plates are in motion, creating
