Idiom Industrialization Of High Order

The book describes the main findings of the EU-funded project IDIHOM (Industrialization of High-Order Methods - A Top-Down Approach). The goal of this project was the improvement, utilization and demonstration of innovative higher-order simulation capabilities for large-scale aerodynamic application challenges in the aircraft industry.

The overall objective of the EU funded 'Industrialisation of high-order methods - a top-down approach' (IDIHOM) project was to enhance and mature adaptive high-order simulation methods for large scale applications in aircraft analysis and design. The project was driven by a top-down approach, in which dedicated enhancements and improvements of the complete high-order simulation framework, including grid generation, flow solver efficiency and flow visualization, were led by a suite of ...

In 2011 the follow-on project IDIHOM (Industrialization of High-Order Methods) was initiated within the 7th European Research Framework Programme. It was motivated by the increasing demand of the European aerospace industries to improve their CFD-aided design procedure and analysis by using accurate and fast numerical methods.
