Marxism Philosophy And Economics

The intense weirdness of all things Marxian begin to become clear to the reader as Sowell first takes you through Marx' philosophy. Once you understand Marx' thinking, it becomes easier to understand where and how he got his economic ideas. The tone is even and professorial throughout the book. There is no attempt to persuade the reader toward or away from Marxism; Sowell simply explains it. However, no objective reader will come away convinced that Marx was right about anything!

Marxian Economics Definition

It would enormously accelerate the economic progress of humanity, while safeguarding the treasures of the natural world that are threatened by capitalist market economics. In the words of Marx "Under socialism people can regulate their interchange with Nature, bringing it under their common control, instead of being ruled by it as by the blind forces of Nature, and achieving this with the least expenditure of energy and under conditions most favourable to, and worthy of, their human nature."

Marxism and philosophy - In Defence of Marxism

Marxism seeks to explain social phenomena within any given society by analyzing the material conditions and economic activities required to fulfill human material needs. It assumes that the form of economic organization, or mode of production, influences all other social phenomena including wider social relations, political institutions, legal systems, cultural systems, aesthetics and ideologies.

Marxism - Wikipedia

Marxism, a body of doctrine developed by Karl Marx and, to a lesser extent, by Friedrich Engels in the mid-19th century. It originally consisted of three related ideas: a philosophical anthropology, a theory of history, and an economic and political program. There is also Marxism as it has been understood and practiced by the various socialist movements, particularly before 1914.

The author begins with a discussion of Marxist economics and philosophy (1), and why those two elements must both be addressed to understand Marx's impact. After that comes a discussion of the dialectical approach (2) and how Marx meant that contested term and how he was inspired by Hegel's emphasis on abstraction.

Marxism: Philosophy and Economics by Thomas Sowell

Karl Marx (1818–1883) is best known not as a philosopher but as a revolutionary, whose works inspired the foundation of many communist regimes in the twentieth century. It is hard to think of many who have had as much influence in the creation of the modern world. Trained as a philosopher, Marx turned away from philosophy in his mid-twenties, towards economics and politics.
