After a 42-0 shellacking over the Riverview Raiders at The Pit to open the season, the Bauxite Miners fell in a close one on the road Friday night. Traveling to Monticello to face the now 2-0 Billies, who were also victorious in Zero Week, the Miners lost a tough one, 26-21, to get to even on the ...

Miners edged on the road | Sports | bentoncourier.com

Mining in the Clouds June, 2011. This post has been split off from an older episode. I woke up before dawn in the western Upper Peninsula. I figured that since I was so close to the Porcupine Mountains, why not go up to Lake of the Clouds and watch the sun rise from the escarpment? That way I could also check out a couple other quick things ...

nailhed: Mining in the Clouds

Clouds are made of water or ice in the air. They are an important part of Earth's weather.

What Are Clouds? | NASA

Clouds are aerosol comprising a visible mass of very small liquid droplets, frozen crystals, or particles suspended in the atmosphere. Clouds are formed as a result of saturation of the air when it is cooled to its dew point or when it gains sufficient moisture from an adjacent source to raise the dew point to the ambient temperature.
