In our Simple Trading Strategy we are using volatility-based exits. Our goal is to accommodate different market conditions by using wider stops and profit targets in a volatile market, while using smaller stops and profit targets in a quiet market. We measure the volatility of a market using the Average Daily Range (ADR).

Day trading is a speculative trading style that involves the opening and closing of a position within the same day. Quick example: If you open a new position at 10AM and close it by 2PM on the same day, you have completed a day trade. If you were to close that same position the following morning, it would no
